ARTICLE I

TOWN MEETINGS

#1. DATE AND TIME OF ANNUAL MEETING. The Town shall have an Annual Town Meeting where registered voters may transact business not required to be determined by official ballot. The Town will hold two regularly scheduled Annual Town Meetings. The Spring Annual Town Meeting shall commence on the first Monday following the first Friday in May. The Fall Annual Town Meeting will be held the last Monday in October, unless the last Monday in October is October 31, in which case the Fall Special Town Meeting will be held on the fourth Monday in October. The first four sessions shall be known as "Town Meeting Week". Notwithstanding the above, whenever an election by official ballot is to be held within Town Meeting Week or it is likely that a significant number of the Town's voters will observe a religious holiday within Town Meeting Week, the Selectmen shall change the date of the first session of Town Meeting and Town Meeting Week to the first Monday of the week thereafter in which Town Meeting Week can be held without the likelihood of such a conflict.

#5. WARRANT OF SPECIAL MEETINGS. The warrant for a Special Meeting shall state the time and place of holding the Meeting and the subjects to be acted upon. Section 10. Demolition Delay

Purpose

This bylaw is adopted to protect and preserve buildings and structures within Holliston which reflect or constitute distinctive features of the architectural, cultural, economic, political or social history of the Town. The intent of the by-law is not to permanently prevent demolition but rather to provide an opportunity to develop preservation solutions for properties threatened with demolition.

To achieve these purposes, the Holliston Historical Commission is empowered to advise the Holliston Building Inspector with respect to the issuance of permits for demolition, and the issuance of demolition permits for significant buildings and structures is regulated as provided in this By-law.

Definitions

"Building or Structure" - Any combination of building materials *giving support or forming a permanent shelter* for persons, animals, or property.

"Business Day" - A day which is not a legal municipal holiday, Saturday or Sunday.

"Commission" - The Holliston Historical Commission.

Town of Holliston

"Demolition" - The act of substantially or totally pulling down, destroying, removing, or razing a building or structure, or commencing the work of total or substantial destruction with the intent of completing the same.

"Historically Significant Building or Structure" - Any building or structure within the Town which is in whole or in part seventy-five (75) or more years old and

- (a) Which is within any local, state or national historic district; or
- (b) Which is listed on or is within an area listed on, the National Register of Historic Places, or which is the subject of a pending application for listing on said National Register; or
- (c) Which is or has been designated by the Commission to be a significant building or structure either:
 - (i) Is importantly associated with one or more historic persons or events, or with the broad architectural, cultural, political, economic, or social history of the Town or the Commonwealth, or
 - (ii) Is historically or architecturally significant (in terms of period, style, method of building construction, or association with a famous architect or builder) either by itself or in the context of a group of buildings.

Procedure

The building inspector shall forward a copy of each demolition permit application for a building or structure to the Commission within five (5) business days of the filing of such application.

Within thirty (30) days from its receipt of a demolition permit application, the Commission shall determine whether the building or structure is historically significant. The applicant for the permit shall be entitled to make a presentation to the Commission if he or she so chooses. If the Commission determines that the building or structure is not historically significant the Commission shall so notify the Building Inspector in writing and the Building Inspector may issue a demolition permit.

If the Commission determines that the building or structure is historically significant, the Commission shall notify the Building Inspector in writing that a demolition review must be made prior to the issuance of any demolition permit. If the Commission fails to notify the Building Inspector of its determination within thirty (30) days of its receipt of the application, then the building or structure shall be deemed not historically significant and the Building Inspector may issue a demolition permit.

Demolition Plan Review.

Not less than sixty (60) days after the Commission's determination that a building or structure is historically significant, the applicant for the permit shall submit to the Commission ten (10) copies of a demolition plan which shall include the following information:

- (i) A map showing the location of the building or structure to be demolished on its property and with reference to neighboring properties;

- (ii) Photographs of all street facade elevations;
- (iii) A description of the building or structure, or part thereof, to be demolished;
- (iv) The reason for the proposed demolition and data supporting said reason, including where applicable data sufficient to establish any economic justification for demolition;
- (v) A brief description of the proposed reuse of the property on which the building or structure to be demolished is located.

Upon receipt of the plan referenced above, the Commission shall fix a reasonable time for a public hearing on the application and shall give public notice thereof by publishing notice of the time, place and purpose of the hearing in a local newspaper at least fourteen (14) days before said hearing and also, within seven (7) days of said hearing, mail a copy of said notice to the applicant and abutters.

After said public hearing, and within sixty (60) days from receipt of the demolition plan, the commission shall file a written report with the Building Inspector on the demolition plan which shall include the following:

- (i) A description of the age, architectural style, historical associations and importance of the building or structure to be demolished;
- (ii) A determination as to whether or not the building or structure should be preferably preserved.

If the building or structure is not determined to be preferably preserved or if the Commission fails to file its report with the Building Inspector within the time period set forth above, then the Building Inspector may issue a demolition permit.

If the building or structure is determined to be preferably preserved following the demolition plan review, then the Building Inspector shall not issue a demolition plan permit for a period of thirty (30) days from the day the Commission's report is filed with the Building Inspector unless the Commission informs the Building Inspector prior to the expiration of such thirty (30) period that the Commission is satisfied that the applicant for the demolition permit has made a bona fide, reasonable and unsuccessful effort to locate a purchaser for the building or structure who is willing to preserve, rehabilitate or restore the building or structure, or has agreed to accept a demolition permit on specified conditions approved by the Commission.

Responsibilities of the Owner.

Once a building or structure has been determined to be a preferably preserved building, the owner shall be responsible for properly securing the building, if vacant, to the satisfaction of the Building Inspector. Should the owner fail to secure the building, a subsequent destruction of the building at any time during the thirty (30) day demolition delay period, which destruction could have been prevented by the required security measures, shall be considered a violation of this by-law.

Emergency Demolition.

If a building or structure poses an immediate threat to public health or safety due to its deteriorated condition, the owner of such building or structure may request issuance of an emergency demolition

permit from the Building Inspector. As soon as practicable after receipt of such request, the Building Inspector shall arrange to have the property inspected. After inspection of the building or structure and consultation with the other members of the board, the Building Inspector shall determine whether the condition of the building or structure represents a serious and imminent threat to public health and safety and whether there is any reasonable alternative to the immediate demolition of the building or structure which would protect public health and safety. If the Building Inspector finds that the condition of the building or structure poses a serious and imminent threat to public health and safety and that there is no reasonable alternative to the immediate demolition of the building or structure, then the Building Inspector may issue an emergency demolition permit to the owner of the building or structure.

Whenever the Building Inspector issues an emergency demolition permit, he shall prepare a written report describing the condition of the building or structure and the basis of his decision to issue an emergency demolition permit. A copy of this written report shall be filed with the Commission.

Enforcement and Remedies.

The Commission and/or Building Inspector are each specifically authorized to institute all actions and proceedings, in law or in equity, as they may deem necessary and appropriate to obtain compliance with the requirements of this By-law or to prevent a threatened violation thereof.

No building permit shall be issued with respect to any premises upon which a building or structure seventy-five years or more old has been voluntarily demolished otherwise than pursuant to a demolition permit granted after compliance with the provisions of this By-law for a period of two years after the date of the completion of such demolition. As used herein "premises" refers to the parcel of land upon which the demolished building or structure was located and all adjoining parcels of land under which the demolished building or structure was located and all adjoining parcels of land under common ownership or control.

Severability.

The Town Clerk shall, upon application and without charge, issue a kennel license to any domestic charitable corporation incorporated exclusively for the purpose of protecting animals from cruelty, neglect or abuse and for the relief of suffering among animals.

The Animal Control Officer may at any time inspect any kennel located in the Town.

Petitions or complaints against any such kennel shall be filed with the Board of Selectmen. The Board, as well as the Town Administrator or their designee, shall have investigatory powers over any such petitions or complaints. Said investigation shall be conducted by the Town Administrator or his designee, who within seven (7) days after the filing of such petition or complaint, shall give notice to all parties of interest of a public hearing to be held before the Board of Selectmen within twenty-one (21) days after the date of such notice. After such public hearing, the Board may make an order either revoking or suspending such kennel license or otherwise regulating such kennel, or dismissing said petition. Within ten (10) days after receipt of such order, the holder of such license may bring a petition in the district court as outlined in section 137c. Any person maintaining a kennel after the license has been revoked or while such license is suspended, shall be punished as set forth in the penalty provision of this By-law.

Section 11. Property Damage.

An owner or keeper of dogs, if known, is responsible for any damages caused to property, livestock or fowl belonging to any other resident. Whoever suffers loss by the worrying, maiming or killing of his livestock or fowls by dogs, whose owner/keeper is unknown, may inform the Animal Control

Officer who shall proceed to the premises where the damage was done and determine whether the same was inflicted by dogs, and, if so, appraise the amount thereof, not to exceed fifty dollars (\$50.00). The Animal Control Officer shall submit a report of the damages found to the Selectmen who shall examine all bills for damages and issue an order upon the Treasurer for such amounts as they decide to be just and shall notify all interested parties of their decision. No reimbursement shall be made for damage by a dog to dogs, cats and other pets.

Any person convicted of a violation of this Article shall be punished by a fine of twenty-five dollars (\$25.00) for the first offense and fifty dollars (\$50.00) for the second or subsequent offense committed during any twelve (12) month period. Each day shall constitute a separate and succeeding offense.

Enforcement of this By-law under the Non-Criminal Disposition process shall be carried out by the Animal Control Officer, any person having police powers or other persons so designated by the Board of Selectmen.

Section 13. Dog Waste.

If any dog, cat or other animal kept as a pet shall defecate upon any land, public or private, within the areas encompassed by regulation, other than with the permission of the landowner thereof, then the owner, keeper or person then walking or otherwise in charge of said animal shall immediately remove or cause to be removed from said property or area all feces so deposited by said animal. Unless said feces are removed, the owner, keeper or person walking or otherwise in charge of said animal (or if said owner, keeper or person shall be a minor then the parent or guardian) shall each be deemed to be in violation of this Article. This regulation shall not apply to an animal accompanying any handicapped person who, by reason of his or her handicap, is physically unable to comply with the requirements of this Section 13.

ARTICLE XXX WETLANDS PROTECTION

Section 1. Membership

The Town shall have a Conservation Commission consisting of seven (7) members appointed by the Board of Selectmen in for a term of three years each and so appointed that no more than three (3) nor less than two (2) shall expire in any one year.

Section 2. Purpose

The purpose of this bylaw is to protect the wetlands, water resources, flood prone areas, and adjoining upland areas in the Town of Holliston by controlling activities deemed by the Holliston Conservation Commission likely to have a significant or cumulative effect on resource area values, including but not limited to the following: public or private water supply, groundwater supply, flood control, erosion and sedimentation control, storm damage prevention, water quality, prevention and control of pollution, fisheries, wildlife, wildlife habitat, rare species habitat including rare plant and

animal species, agriculture, aquaculture, and recreation values, deemed important to the community (collectively, the “resource area values protected by this bylaw”).

This bylaw is intended to utilize the Home Rule authority of the Town so as to protect the resource areas under the Wetlands Protection Act (G.L. Ch.131 §40; the “Act”) to a greater degree, to protect additional resource areas beyond the Act recognized by the Town as significant, to protect all resource areas for their additional values beyond those recognized in the Act, and to impose in local regulations and permits additional standards and procedures stricter than those of the Act and regulations thereunder (310

CMR 10.00), subject, however, to the rights and benefits accorded to agricultural uses and structures of all kinds under the laws of the Commonwealth and other relevant bylaws of the Town of Holliston.

Section 3. Jurisdiction

Except as permitted by the Conservation Commission no person shall commence to remove, fill, dredge, build upon, discharge into, or otherwise alter the following resource areas:

- A. Any wetlands, marshes, wet meadows, bogs, swamps, vernal pools, springs, banks, reservoirs, lakes, ponds of any size, beaches, and any lands under water bodies and/or intermittent or perennial streams, brooks and creeks;
- B. lands adjoining the resource areas specified in Section II.A out to a distance of 100 feet, known as the buffer zone;
- C. perennial rivers, streams, brooks and creeks;
- D. lands adjoining the resource areas specified in Section II.C out to a distance of 200 feet, known as the riverfront area;
- E. any lands subject to flooding or inundation by groundwater or surface water;

Collectively the areas specified in Sections II.A-E, constitute the “resource areas protected by this bylaw”. Said resource areas shall be protected whether or not they border surface waters.

Section 4. Exemptions and Exceptions

The applications and permits required by this bylaw shall not be required for work performed for normal maintenance or improvement of land in agricultural and aquacultural use as defined by the Wetlands Protection Act regulations at 310 CMR 10.04.

The applications and permits required by this bylaw shall not be required for maintaining, repairing, or replacing, but not substantially changing or enlarging, an existing and lawfully located structure or facility used in the service of the public to provide electric, gas, water, sewer, drainage, telephone, telegraph, or other telecommunication services, provided that written notice has been given to the Conservation Commission prior to commencement of work, and provided that the work conforms to any performance standards and design specifications in regulations adopted by the Commission.

The applications and permits required by this bylaw shall not be required for emergency projects necessary for the protection of the health and safety of the public, provided that the work is to be performed by or has been ordered to be performed by an agency of the Commonwealth or a political subdivision thereof; provided that advance notice, oral or written, has been given to the Commission prior to commencement of work or within 24 hours after commencement; provided that the Commission or its agent certifies the work as an emergency project; provided that the work is performed only for the time and place certified by the Commission for the limited purposes necessary to abate the emergency; and provided that within 21 days of commencement of an emergency project a permit application shall be filed with the Commission for review as provided by this bylaw. Upon

failure to meet these and other requirements of the Commission, the Commission may, after notice and a public hearing, revoke or modify an emergency project approval and order restoration and mitigation measures.

Other than stated in this bylaw, the exceptions provided in the Wetlands Protection Act (G.L. Ch. 131 §40) and regulations (310 CMR 10.00) shall not apply under this bylaw.

Section 5. Applications, Application Fees and Consultant Fees

A. Applications and Application Fees

Written application shall be filed with the Conservation Commission to perform activities affecting resource areas protected by this bylaw. No activities shall commence without receiving and complying with a permit issued pursuant to this bylaw.

The application may be in the form of a Notice of Intent, Abbreviated Notice of Intent, Abbreviated Notice of Resource Area Delineation, or Request for Determination of Applicability, or other form as the Commission specifies in its regulations. The permit application shall include such information and plans as are deemed necessary by the Commission to describe proposed activities and their effects on the resource areas protected by this bylaw.

The Commission may accept as the application and plans under this bylaw any application and plans filed under the Wetlands Protection Act (G.L. Ch. 131 §40) and regulations (310 CMR 10.00), but the Commission is not obliged to do so.

Any person desiring to know whether or not a proposed activity or an area is subject to this bylaw may in writing request a determination from the Commission. Such a Request for Determination of Applicability ("RDA") or Abbreviated Notice of Resource Area Delineation ("ANRAD") shall include information and plans as are deemed necessary by the Commission.

At the time of an application, the applicant shall pay a filing fee specified in regulations of the Commission. The fee shall be deposited into a dedicated account for use only for wetlands protection activities, including but not limited to administration of this Bylaw. The filing fee is in addition to that required by the Wetlands Protection Act and Department of Environmental Protection ("DEP") wetland regulations (310 CMR 10.00). The Commission may waive the filing fee for a government agency.

B. Consultant Fees

Pursuant to G.L. Ch. 44 §53G and regulations promulgated by the Commission, the Commission may impose reasonable fees upon an applicant for the purpose of securing outside consultants including but not limited to engineers, wetlands scientists, wildlife biologists, attorneys, or other experts in order to aid in the review of a proposed project(s). Such funds shall be deposited with the town treasurer, who shall create an account specifically for this purpose. Additional consultant fees may be requested where the requisite review is more expensive than originally calculated or where new information requires additional consultant services.

Only costs relating to consultant work done in connection with a project for which a consultant fee has been collected shall be paid from this account, and expenditures may be made at the sole discretion of the Commission. Any consultant hired under this provision shall be selected by, and report exclusively to, the Commission. The Commission shall provide an applicant with written

notice of the selection of a consultant, identifying the consultant, the amount of the fee to be charged to the applicant, and a request for payment of that fee. Notice shall be deemed to have been given on the date it is mailed or delivered. The applicant may withdraw the application or request within five (5) business days of the date notice is given without incurring any costs or expenses.

The entire fee must be received before the initiation of consulting services. Failure by the applicant to pay the requested consultant fee within ten (10) business days of the request for payment shall be cause for the Commission to declare the application administratively incomplete and deny the permit without prejudice, except in the case of an appeal. The Commission shall inform the applicant and DEP of such a decision in writing.

The applicant may appeal the selection of an outside consultant to the Board of Selectmen, who may disqualify the consultant only on the grounds that the consultant has a conflict of interest or is not properly qualified. The minimum qualifications shall consist of either an educational degree or three or more years of practice in the field at issue, or a related field. The applicant shall make such an appeal in writing, and must be received within ten (10) business days of the date that request for consultant fees was made by the Commission. Such appeal shall extend the applicable time limits for action upon the application.

Section 6. Notice and Hearings

Any person filing a permit application with the Conservation Commission at the same time shall give written notice thereof, by certified mail (return receipt requested) or hand delivered, to all abutters at their mailing addresses shown on the most recent applicable tax list of the assessors, including owners of land directly opposite on any public or private street or way, and abutters to the abutters within 100 feet of the property line of the applicant, including any in another municipality or across a body of water. The notice shall state a brief description of the project or other proposal and the date of any Commission hearing or meeting date if known. The notice to abutters also shall include a copy of the application or request, with plans, or shall state where copies may be examined and obtained by abutters. An affidavit of the person providing such notice, with a copy of the notice mailed or delivered, shall be filed with the Commission. When a person requesting a Determination of Applicability is other than the owner, the request, the notice of the hearing and the determination itself shall be sent by the Commission to the owner as well as to the person making the request.

The Commission shall conduct a public hearing on any permit application provided that written notice is given at the expense of the applicant, at least five business days prior to the hearing, in a newspaper of general circulation in the Town of Holliston. The Commission shall commence the public hearing within 21 days from receipt of a completed permit application unless an extension is authorized in writing by the applicant. The Commission shall have authority to continue the hearing to a specific date announced at the hearing, for reasons stated at the hearing, which may include the need for additional information from the applicant or others as deemed necessary by the Commission in its discretion, based on comments and recommendations of the boards and officials listed in §VI.

The Commission shall issue its permit, other order or determination in writing within 21 days of the close of the public hearing thereon unless an extension is authorized in writing by the applicant.

The Commission may combine its hearing under this bylaw with the hearing conducted under the Wetlands Protection Act (G.L. Ch.131 §40) and regulations (310 CMR 10.00).

Section 7. Coordination with Other Boards

Any person filing a permit application with the Conservation Commission shall provide at the same time, by certified mail (return receipt requested) or hand delivery, notice of such filing to the Board of Selectmen, Planning Board, Board of Appeals, Board of Health, Building Inspector, and other Town of Holliston officials or boards as designated by the Commission in its regulations. Notice shall be provided in the same manner to the Conservation Commission of an adjoining municipality if the permit application pertains to property within 300 feet of that municipality. An affidavit of the person providing notice, with a copy of the notice mailed or delivered, shall be filed with the Commission. The Commission shall not take final action until the above boards and officials have had 14 days from receipt of notice to file written comments and recommendations with the Commission, which the Commission shall take into account but which shall not be binding on the Commission. The applicant shall have the right to receive any comments and recommendations, and to respond to them at a hearing of the Commission, prior to final action.

Section 8. Permits and Conditions

The Conservation Commission, after a public hearing, shall determine whether the activities which are subject to the permit application, or the land and water uses which will result therefrom, are likely to have a significant individual or cumulative effect on the resource area values protected by this bylaw. The Commission shall take into account the extent to which the applicant has avoided, minimized, and mitigated any such effect. The Commission also shall take into account any loss, degradation, isolation, and replacement or replication of such protected resource areas elsewhere in the community and the watershed, resulting from past activities, whether permitted, unpermitted or exempt, and foreseeable future activities. Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

The Commission shall issue a permit approving the activities which are subject to the permit application, or the land and water uses which will result therefrom, after it determines that said activities, or uses which will result therefrom, will not have a significant individual or cumulative effect on the resource area values protected by this bylaw and comply with the procedures, design specifications, performance standards, and other requirements in regulations of the Commission. If it issues a permit, the Commission shall impose conditions which the Commission deems necessary or desirable to protect said resource area values, and all activities shall be conducted in accordance with those conditions. Where no conditions are adequate to protect said resource area values, the Commission is empowered to deny a permit for failure to meet the requirements of this bylaw. It may also deny a permit: for failure to submit necessary information and plans requested by the Commission; for failure to comply with the procedures, design specifications, performance standards, and other requirements in regulations of the Commission; or for failure to avoid, minimize or mitigate unacceptable significant or cumulative effects upon the resource area values protected by this bylaw. The Commission may issue a Determination of Applicability that no further permit application need be filed with the Commission for a proposed activity within jurisdiction of this bylaw as long as the activity complies with conditions that the Commission imposes in said determination.

The Commission within 21 days of the close of the public hearing shall issue or deny a permit for the activities requested.

The Commission may waive specifically identified and requested procedures, design specifications, performance standards, or other requirements set forth in its regulations, provided that: the Commission finds in writing after said public hearing that there are no reasonable conditions or alternatives that would allow the proposed activity to proceed in compliance with said regulations;

that avoidance, minimization and mitigation have been employed to the maximum extent feasible; and that the waiver is necessary to accommodate an overriding public interest or to avoid a decision that so restricts the use of the property as to constitute an unconstitutional taking without compensation.

In reviewing activities within the buffer zone, the Commission shall presume such areas are important to the protection of other resource areas because activities undertaken in close proximity have a high likelihood of adverse impact, either immediately, as a consequence of construction, or over time, as a consequence of daily operation or existence of the activities. This presumption is rebuttable and may be overcome by credible evidence from a competent source that such buffer zones are not important to protection of other resource areas. These adverse impacts from construction and use can include, without limitation, erosion, siltation, loss of groundwater recharge, poor water quality, and loss or degradation of wildlife and wildlife habitat. The Commission may establish, in its regulations, design specifications, performance standards, and other measures and safeguards, including setbacks, no-disturb areas, no-build areas, and other work limits for protection of buffer zones, including without limitation, area strips of continuous, undisturbed vegetative cover. Such design specifications, performance standards, and other measures and safeguards shall apply unless the applicant convinces the Commission that the buffer zone area or part of it may be disturbed without harm to the values protected by the bylaw.

In reviewing activities within the riverfront area, the Commission shall presume the riverfront area is important to all the resource area values unless demonstrated otherwise, and no permit issued hereunder shall permit any activities unless the applicant, in addition to meeting the otherwise applicable requirements of this bylaw, has proved by a preponderance of the credible evidence that (1) there is no practicable alternative to the proposed project with less adverse effects, and that (2) such activities, including proposed mitigation measures, will have no significant adverse impact on the areas or values protected by this bylaw. The Commission shall regard as practicable an alternative which is reasonably available and capable of being done after taking into consideration the proposed property use, overall project purpose (e.g., residential, institutional, commercial, or industrial), logistics, existing technology, costs of the alternatives, and overall project costs.

To prevent resource area loss, the Commission shall require applicants to avoid alteration wherever feasible; to minimize alteration; and, where alteration is unavoidable and has been minimized, to provide full mitigation. The Commission may authorize or require replication of wetlands as a form of mitigation but, because of the high likelihood of failure of replication, only with specific plans, professional design, proper safeguards, adequate security, and professional monitoring and reporting to assure success.

The Commission may require a wildlife habitat study of the project area, to be paid for by the applicant, whenever it deems appropriate, regardless of the type of resource area or the amount or type of alteration proposed. The decision to require a wildlife habitat study shall be based upon the Commission's estimation of the importance of the habitat area considering (but not limited to) such factors as proximity to other areas suitable for wildlife, importance of wildlife "corridors" in the area, or actual or possible presence of rare plant or animal species in the area. The work shall be performed by an individual who meets or exceeds the minimum qualifications set out in the wildlife habitat section of the Wetlands Protection Act regulations (310 CMR 10.60) and, when required by the Commission, has direct professional experience with the wildlife species or wildlife habitat at issue.

The Commission shall presume that all areas meeting the definition of “vernal pools” under §IX of this bylaw, including the adjacent buffer zone area, perform essential habitat functions. This presumption may be overcome only by the presentation of credible evidence which, in the judgment of the Commission, demonstrates that the basin or depression does not provide essential vernal pool habitat functions. Any formal evaluation should be performed by an individual who meets or exceeds the minimum qualifications under the wildlife habitat section of the Wetlands Protection Act regulations (310 CMR 10.60) and, when required by the Commission, has direct professional experience with the wildlife species or wildlife habitat at issue.

A permit, Order of Conditions, (“OOC”), Determination of Applicability (“DOA”), or Order of Resource Area Delineation (“ORAD”) shall expire three years from the date of issuance. Notwithstanding the above, the Commission in its discretion may issue a permit expiring five years from the date of issuance for recurring or continuous maintenance work, provided that annual notification of time and location of work is given to the Commission. Any permit may be renewed for one or more additional one-year periods, provided that a request for a renewal is received in writing by the Commission thirty (30) days prior to expiration. Notwithstanding the above, a permit may identify requirements which shall be enforceable for a stated number of years, indefinitely, or until permanent protection is in place, and shall apply to all present and future owners of the land.

For good cause the Commission may revoke any permit, OOC, DOA, or ORAD or any other order, determination or other decision issued under this bylaw after notice to the holder, the public, abutters, and town boards, pursuant to §V and §VI, and after a public hearing.

Amendments to permits, OOCs, DOAs, or ORADs shall be handled in the manner set out in the Wetlands Protection Act regulations and policies thereunder.

The Commission may combine the decision issued under this bylaw with the OOC, DOA, ORAD, or Certificate of Compliance (“COC”) issued under the Wetlands Protection Act and regulations.

No work proposed in any application shall be undertaken until the permit, or ORAD issued by the Commission with respect to such work has been recorded in the registry of deeds or, if the land affected is registered land, in the registry section of the land court for the district wherein the land lies, and until the holder of the permit certifies in writing to the Commission that the document has been recorded. If the applicant fails to perform such recording, the Commission may record the documents itself and require the Applicant to furnish the recording fee therefore, either at the time of recording or as a condition precedent to the issuance of a COC.

Section 9. Regulations

After public notice and public hearing, the Conservation Commission shall promulgate and amend rules and regulations to effectuate the purposes of this bylaw, effective when voted and filed with the town clerk. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this bylaw. At a minimum these regulations shall reiterate the terms defined in this bylaw, define additional terms not inconsistent with the bylaw, and impose filing and consultant fees.

Section 10. Definitions

The following definitions shall apply in the interpretation and implementation of this bylaw.

The term “**agriculture**” shall refer to the definition as provided by G.L. Ch. 128, §1A.

The term “**alter**” shall include, without limitation, the following activities when undertaken to, upon, within or affecting resource areas protected by this bylaw:

- A. Removal, excavation, or dredging of soil, sand, gravel, or aggregate materials of any kind
- B. Changing of preexisting drainage characteristics, flushing characteristics, salinity distribution, sedimentation patterns, flow patterns, or flood retention characteristics
- C. Drainage, or other disturbance of water level or water table
- D. Dumping, discharging, or filling with any material which may degrade water quality
- E. Placing of fill, or removal of material, which would alter elevation
- F. Driving of piles, erection, expansion or repair of buildings, or structures of any kind
- G. Placing of obstructions or objects in water
- H. Destruction of plant life including cutting or trimming of trees, shrubs, or undergrowth
- I. Changing temperature, biochemical oxygen demand, or other physical, biological, or chemical characteristics of any waters
- J. Any activities, changes, or work which may cause or tend to contribute to pollution of any body of water or groundwater
- K. Incremental activities which have, or may have, a cumulative adverse impact on the resource areas protected by this bylaw.

The term “**bank**” shall include the land area which normally abuts and confines a water body; the lower boundary being the mean annual low flow level, and the upper boundary being the first observable break in the slope or the mean annual flood level, whichever is higher.

The term “buffer zone”, as defined in Section II.B above, is that resource area which extends one hundred feet (100’) from the edge of those wetland resource areas identified in Section II.A.

- a. **50-Foot No-Disturbance Zone is that portion of the Buffer Zone which extends fifty (50) feet from the edge of those wetland resource areas identified in Section II.A; however, it is possible that these resource areas will overlap in some instances (e.g., Riverfront Area and Land Subject to Flooding). Disturbance of any kind is prohibited within this Zone including but not limited to grading, landscaping, vegetation removal, pruning, cutting, filling, excavation, roadway construction and /or driveway construction.**
- b. **100-Foot No-Disturbance Zone is that buffer zone area that extends one hundred (100) feet from the edge of any Vernal Pool that is located in an upland area or, in the case of a larger wetland resource area that encompasses the pool, within one hundred (100) feet from the edge of the said larger wetland resource area. Disturbance of any kind is prohibited within this Zone including but not limited to grading, landscaping, vegetation removal, pruning, cutting, filling, excavating, roadway construction and/or driveway construction. The extent and location of this No-Disturbance Zone is subject to change based on the results of a biological and/or habitat evaluation, which may be required to determine the migratory pathways and other important habitat usage of Vernal Pool breeders.**

The term “**build upon**” shall mean construction of any kind of structure, whether on land or in water; and/or placing of obstructions or objects in water (other than fish or shellfish traps, pens or trays used in conjunction with aquaculture, or aids to navigation).

The term “**cumulative adverse effect**” shall mean an effect on a resource area(s) that is significant when considered in combination with other activities that have occurred, are occurring simultaneously or that are reasonably likely to occur within that resource area(s), whether such other activities have occurred or are contemplated as a separate phase of the same project or activities, or as a result of unrelated projects or activities.

The term “**discharge into**” means, without limitation, any outfall of water that empties into a resource area or buffer zone, including infiltration.

The term “**erosion control**” means the prevention of the detachment or movement of soil or rock fragments by water, wind, ice, or gravity.

The term “**groundwater**” shall mean all subsurface water contained in natural geologic formations or artificial fill including soil water in the zone of aeration. Activities within 100 feet of resource areas shall not significantly alter the existing quality or elevation of naturally occurring groundwater.

The term “**permits**” shall collectively refer to Orders of Conditions, Notice(s) of Non-Significance, Enforcement Order(s), Determinations of Applicability, and/or Orders of Resource Area Delineation.

The term “**person**” shall include any individual, group of individuals, association, partnership, corporation, company, business organization, trust, estate, the Commonwealth or political subdivision thereof to the extent subject to town bylaws, administrative agency, public or quasi-public corporation or body, this municipality, and any other legal entity, its legal representatives, agents, or assigns.

The term “**pond**” shall follow the definition of 310 CMR 10.04 except that the size threshold of 10,000 square feet shall not apply.

The term “**private water supply**” shall mean any source or volume of surface or groundwater demonstrated to be in any private use or shown to have potential for private use for domestic purposes.

The term “**public water supply**” shall mean any source or volume of surface water or groundwater demonstrated to be in public use or approved for water supply pursuant to M.G.L. c. 111, Section 160 by the Division of Water Supply of the Department of Environmental Protection or shown to have a potential for public use.

The term “**rare species**” shall include, without limitation, all vertebrate and invertebrate animal and plant species listed as endangered, threatened, or of special concern by the Massachusetts Division of Fisheries and Wildlife, regardless whether the site in which they occur has been previously identified by the Division.

The term “**recreation**” shall mean any leisure activity or sport taking place in, on, or within 100 feet of a resource area which is dependent on the resource area and its values directly or indirectly for its conduct and enjoyment. Recreational activities include, but are not limited to, the following: noncommercial fishing and hunting, boating, swimming, walking, painting, birdwatching and aesthetic enjoyment. Structures and activities in or within 100 feet of a resource area shall not have a significant effect on public recreational values. Notwithstanding this definition, new or expanded

recreational activities shall not have a significant effect on other wetlands values identified in §I of this chapter.

The term “**spring**” shall mean any point in the natural environment where water discharges to the surface of the earth from underground.

The term “**vernal pool**” shall include, in addition to scientific definitions found in the regulations under the Wetlands Protection Act, any confined basin or depression not occurring in existing lawns, gardens, landscaped areas or driveways which, at least in most years, holds water for a minimum of two continuous months during the spring and/or summer, is free of adult predatory fish populations, and provides essential breeding and rearing habitat functions for amphibian, reptile or other vernal pool community species, regardless of whether the site has been certified by the Massachusetts Division of Fisheries and Wildlife. The boundary of the resource area for vernal pools shall be the mean annual high-water line defining the depression.

The term “**wildlife**” shall mean all non-domesticated mammals, birds, reptiles, amphibians, fishes or invertebrates. Special consideration shall only be given to members of the class Insecta if they are rare or endangered as defined by the Massachusetts Natural Heritage Program or its successor, or if they are a major food source of other wildlife, but not if the insect species is determined by the Commission and the Board of Health to constitute a pest whose protection under the By-law would be a risk to man at the proposed project site.

The term “**wildlife habitat**” shall mean areas having plant community composition and structure, hydrologic regime, or other characteristics sufficient to provide shelter, nutrient sourcing, growing conditions, nesting or breeding sites conducive to the propagation and preservation of wildlife. Except as otherwise provided in this bylaw or in associated regulations of the Conservation Commission, the definitions of terms and the procedures in this bylaw shall be as set forth in the Wetlands Protection Act (G.L. Ch. 131 §40) and regulations (310 CMR 10.00).

Section 11. Security

As part of a permit issued under this bylaw, in addition to any security required by any other municipal or state board, agency, or official, the Conservation Commission may require that the performance and observance of the conditions imposed thereunder (including conditions requiring mitigation work) be secured wholly or in part by one or both of the methods described below:

A. By a proper bond, deposit of money or negotiable securities under a written third-party escrow arrangement, or other undertaking of financial responsibility sufficient in the opinion of the Commission, to be released in whole or in part upon issuance of a COC for work performed pursuant to the permit.

B. By accepting a conservation restriction, easement, or other covenant enforceable in a court of law, executed and duly recorded by the owner of record, running with the land to the benefit of this municipality whereby the permit conditions shall be performed and observed before any lot may be conveyed other than by mortgage deed. This method shall be used only with the consent of the applicant, shall not impose on the Commission any monitoring, reporting, or maintenance duties or obligations, and a charitable corporation or trust must be a grantee in addition to the Commission.

Section 12. Enforcement

Town of Holliston

No person shall remove, fill, dredge, build upon, degrade, or otherwise alter resource areas protected by this bylaw, or cause, suffer, or allow such activity, or leave in place unauthorized fill, or otherwise fail to restore illegally altered land to its original condition, or fail to comply with a permit or an enforcement order issued pursuant to this bylaw.

The Conservation Commission, its agents, officers, and employees shall have authority to enter upon privately owned land for the purpose of performing their duties under this bylaw and may make or cause to be made such examinations, surveys, or sampling as the Commission deems necessary, subject to the constitutions and laws of the United States and the Commonwealth.

The Commission shall have authority to enforce this bylaw, its regulations, and permits issued thereunder by letters, phone calls, electronic communication and other informal methods, violation notices, non-criminal citations under G.L. Ch. 40 §21D, and civil and criminal court actions.

Any person who violates provisions of this bylaw may be ordered to restore the property to its original condition and take other action deemed necessary to remedy such violations, or may be fined, or both.

Upon request of the Commission, the Board of Selectmen and town counsel shall take legal action for enforcement under civil law. Upon request of the Commission, the chief of police shall take legal action for enforcement under criminal law.

Municipal boards and officers, including any police officer or other officer having police powers, shall have authority to assist the Commission in enforcement.

Any person who violates any provision of this bylaw, or regulations, permits, or administrative orders issued thereunder, shall be punished by a fine of not more than \$300. Each day or portion thereof during which a violation continues, or unauthorized fill or other alteration remains in place, shall constitute a separate offense, and each provision of the bylaw, regulations, permits, or administrative orders violated shall constitute a separate offense.

As an alternative to criminal prosecution in a specific case, the Commission may issue citations with specific penalties pursuant to the non-criminal disposition procedure set forth in G.L. Ch. 40 §21D, which has been adopted by the Town in Article XXIV §9 of the general bylaws. The penalty shall be \$100 for the first violation, \$200 for the second violation, and \$300 for each and all successive violations.

Section 13. Burden of Proof

The applicant for a permit shall have the burden of proving by a preponderance of the credible evidence that the work proposed in the permit application will not have unacceptable significant or cumulative effects upon the resource area values protected by this bylaw. Failure to provide adequate evidence to the Conservation Commission supporting this burden shall be sufficient cause for the Commission to deny a permit or grant a permit with conditions.

Section 14. Appeals

A decision of the Conservation Commission shall be reviewable in the superior court in accordance with G.L. Ch. 249 §4.

Section 15. Relation to the Wetlands Protection Act

This bylaw is adopted under the Home Rule Amendment of the Massachusetts Constitution and the Home Rule statutes, independent of the Wetlands Protection Act (G.L. Ch. 131 §40) and regulations (310 CMR 10.00) thereunder. It is the intention of this bylaw that the purposes, jurisdiction, authority, exemptions, regulations, specifications, standards, and other requirements shall be interpreted and administered as stricter than those under the Wetlands Protection Act and regulations.

Section 16. Severability

The invalidity of any section or provision of this bylaw shall not invalidate any other section or provision thereof, nor shall it invalidate any permit, approval or determination which previously has been issued.

ARTICLE XXXI ACCOUNTANT

Section 1. The Town shall have an Accountant who shall be appointed by the Town Administrator. (Approved 5/5/98).

Section 2. The Accountant shall examine the books and accounts of all Town officers and committees entrusted with the receipt, custody or expenditure of money, and all original bills and vouchers on which money has been or may be paid from the Town's treasury.

Section 3. The Accountant shall have such other functions and powers as provided in the General Laws as amended, including but not limited to Chapter 41.

ARTICLE XXXII PERSONNEL BOARD

Section 1. The Town shall have a Personnel Board, consisting of five members, appointed by the Board of Selectmen, in May, for a term of three years each, and so appointed that the term of no more than two (2) shall expire in any one year; provided, however, that of the members originally appointed, two (2) shall be appointed for a term of one year, two (2) for a term of two years and one for a term of three (3) years, as designated by the Selectmen. Appointees hereunder shall continue to hold their offices until the appointment and qualification of their successors. At least one member of the Personnel Board shall be qualified by reason of his or her experience in personnel administration.
