

## **AnyFence, 1485 Washington Street – Summary of Plan Revisions**

### **C-2.0 Layout and Materials Plan**

- The length of the 7 parking spaces adjacent to the warehouse on the rear of the site changed from 18 ft to 22 ft to provide better parking for the trucks.
- The storage area in front of the modified parking spaces was reduced to a width of approximately 11', providing 678 square feet of storage area at that location (previously proposed as 915 ft).
- At the rear of the site, on the right side, the 3 parking spaces swapped locations with the adjacent storage space, and a fourth parking space was added in the main rear storage area. The 4th parking space is called out to be used as storage if the number of crew employees is less than 10.
