

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the RED (high risk) level, based on new cases in the 14 day period ending January 2. According to their weekly reports, our numbers increased from 40.6 Average Daily Incident Rate per 100,000 on December 31 up to 42.67 Average Daily Incident Rate per 100,000 on January 7. For the fourth consecutive week, that is again our highest Average Daily Incident Rate to date.

Average Daily Incident Rate per 100,000 (last* 14 days)

Metrics (as of November 6) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

Looking at our list of active cases, there are 14 clusters co-located at single family homes, 1 cluster at a multi-family dwelling, 45 individual cases at other single family homes, 2 individual cases at multi-family dwellings, and 1 cluster at an elderly housing complex. That means our 90 cases are spread out over 63 distinct addresses.
