

## Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the RED (high risk) level, based on new cases in the 14 day period ending January 9. According to their weekly reports, our numbers increased from 42.67 Average Daily Incident Rate per 100,000 on January 7 up to 54.1 Average Daily Incident Rate per 100,000 on January 14. For the fifth consecutive week, that is again our highest Average Daily Incident Rate to date (and more than double what it was on December 10).

### Average Daily Incident Rate per 100,000 (last\* 14 days)

|           |            |            |            |            |
|-----------|------------|------------|------------|------------|
| 8/12/2020 | 8/19/2020  | 8/26/2020  |            |            |
| 3.1       | 0          | 2.6        |            |            |
| 9/2/2020  | 9/9/2020   | 9/16/2020  | 9/23/2020  | 9/30/2020  |
| 5.7       | 3.1        | 1.1        | 8.3        | 9.3        |
| 10/7/2020 | 10/14/2020 | 10/22/2020 | 10/29/2020 |            |
| 5.7       | 8.8        | 9.3        | 13.0       |            |
| 11/6/2020 | 11/12/2020 | 11/19/2020 | 11/27/2020 |            |
| 18.2      | 16.7       | 16.1       | 25.5       |            |
| 12/3/2020 | 12/10/2020 | 12/17/2020 | 12/24/2020 | 12/31/2020 |
| 25.5      | 25.5       | 31.7       | 37.5       | 40.6       |
| 1/7/2021  | 1/14/2021  |            |            |            |
| 42.67     | 54.1       |            |            |            |

### Metrics (as of November 6) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*\*last 14 days* refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

Looking at our list of active cases, there are 26 clusters co-located at single family homes, 1 cluster at a multi-family dwelling, 54 individual cases at other single family homes, 8 individual cases at multi-family dwellings, 1 cluster at a long-term care facility, 1 individual case in a congregate care setting, 1 cluster at an elderly housing complex, and 1 individual case at an elderly housing complex. Our 148 cases are spread out over 93 distinct addresses.

According to an analysis of MAVEN data, the highest increases in the last 10 days have been in the 0-9 (27%), 80-89 (24%), and 40-49 (23%) age ranges. The 90+ age range also increased for the first time since December 10.
