

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the RED level, based on new cases in the 14 day period ending January 15. According to their weekly reports, our numbers increased from 217.5 Average Daily Incident Rate per 100,000 on January 13 to 221.5 Average Daily Incident Rate per 100,000 on January 20. Our percent positivity increased from 18% last week to 18.49% this week.

Average Daily Incident Rate per 100,000 (last* 14 days)

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

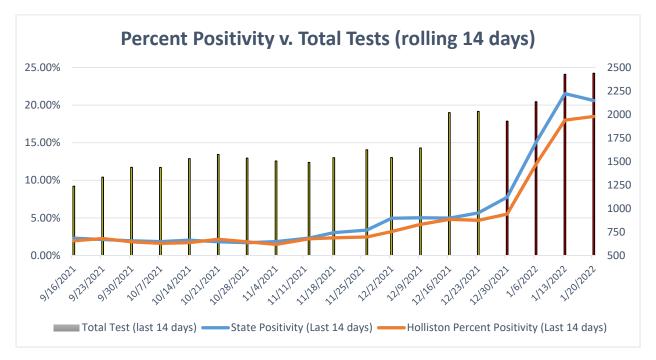

Green: less than 10 cases per 100,000 population AND greater than 10 total cases Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

We currently have one hundred and twenty active cases; including fourteen clusters in single family homes, and four individual cases in multi-family dwellings.

According to vaccination data by community released by the state, 100% of the population is partially vaccinated, and 91% of the population is fully vaccinated as of January 18. As of the report 113% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 87% of the 5-11 year old, 117% of the 12-15 year olds, and 125% of the 16-19 year olds having already received at least one shot.

^{*}last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

In the last week, the number of cases increased the most in the 0-9 (15%), 11-19 (12%), 30-39, 60-69 and 70-79 (8%) ages.
