

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation lowered to the **YELLOW** level, based on new cases in the 14 day period ending February 19. According to their weekly reports, our numbers lowered from 41.1 Average Daily Incident Rate per 100,000 on February 17 to 23.4 Average Daily Incident Rate per 100,000 on February 24. Our percent positivity lowered from 7.03% last week to 4.28% this week.

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

We currently have seventeen active cases; including one cluster in a single family home, and two single cases in multiple family dwellings.

According to vaccination data by community released by the state, 101% of the population is partially vaccinated, and 92% of the population is fully vaccinated as of February 22. As of the report 114% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 94% of the 5-11 year old, 118% of the 12-15 year olds, and 126% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 0-9, 10-19, 30-39, 40-49 and 60-69 ages.
