

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the YELLOW level, based on new cases in the 14 day period ending February 26. According to their weekly reports, our numbers lowered from 23.4 Average Daily Incident Rate per 100,000 on February 24 to 13.5 Average Daily Incident Rate per 100,000 on March 3. Our percent positivity lowered from 4.28% last week to 3.31% this week.

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

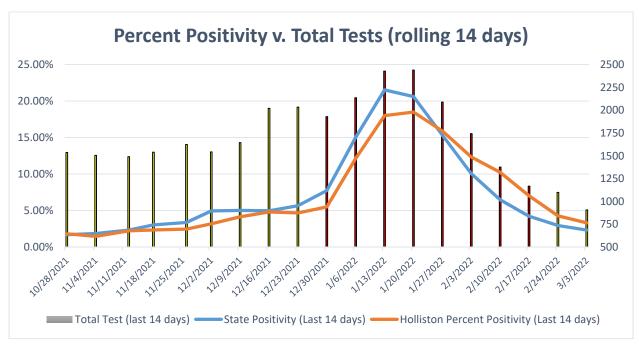

Green: less than 10 cases per 100,000 population AND greater than 10 total cases Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

We currently have thirteen active cases; including twelve individual cases in single family homes, and one individual case in a multi-family dwelling.

According to vaccination data by community released by the state, 102% of the population is partially vaccinated, and 92% of the population is fully vaccinated as of March 1. As of the report 114% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 94% of the 5-11 year old, 118% of the 12-15 year olds, and 126% of the 16-19 year olds having already received at least one shot.

^{*}last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

In the last week, the number of cases increased the most in the 60-69 (2%), and 20-29 (1%) ages.
