

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **GREEN** level, based on new cases in the 14 day period ending March 12. According to their weekly reports, our numbers lowered from 8.8 Average Daily Incident Rate per 100,000 on March 10 to 5.7 Average Daily Incident Rate per 100,000 on March 17. Our percent positivity lowered from 2.55% last week to 1.38% this week.

Average Daily Incident Rate per 100,000 (last* 14 days)

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

We currently have four active cases; all individual cases in single family homes.

According to vaccination data by community released by the state, 102% of the population is partially vaccinated, and 92% of the population is fully vaccinated as of March 15. As of the report 114% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 95% of the 5-11 year old, 119% of the 12-15 year olds, and 126% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 20-29, 50-59, and 60-69 (1%) ages.
