

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **RED** level, based on new cases in the 14 day period ending May 7. According to their weekly reports, our numbers raised from 33.3 Average Daily Incident Rate per 100,000 on May 5 to 34.3 Average Daily Incident Rate per 100,000 on May 12. Our percent positivity lowered from 7.26% last week to 7.08% this week.

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

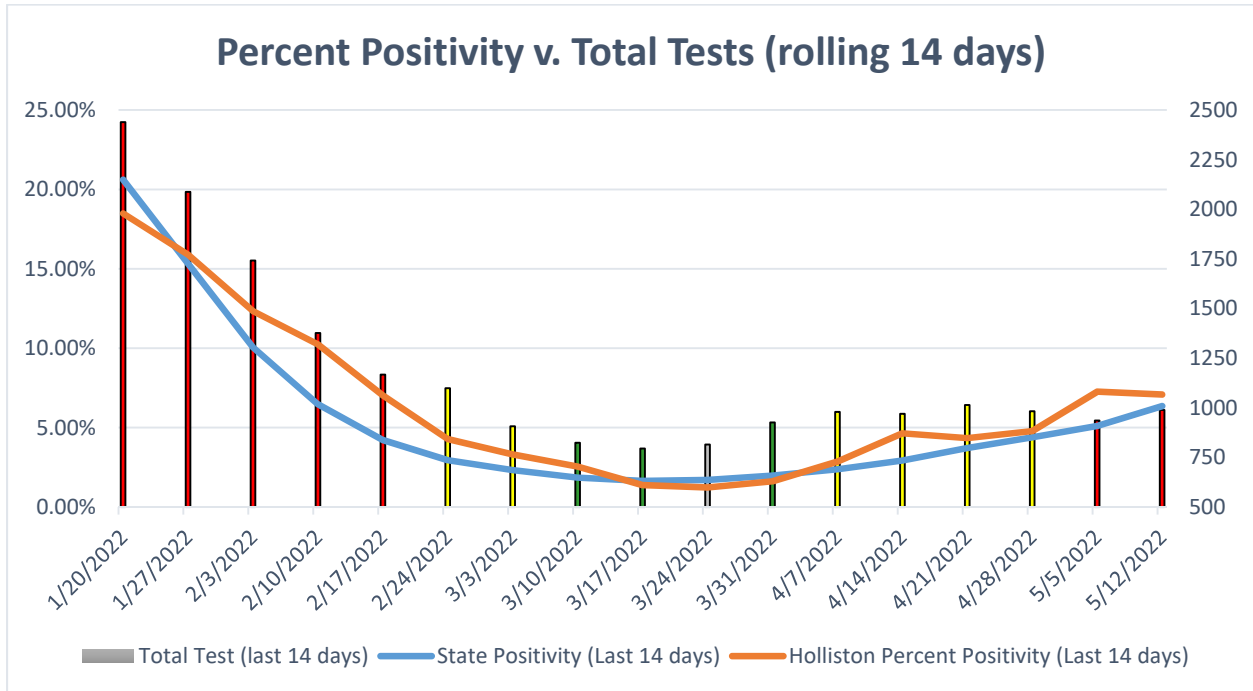

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

**last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report*

We currently have thirty four active cases; including twenty four individual cases in single family homes, three clusters in single family homes, two individual cases in multi-family dwellings, and one individual case in a congregate care setting.

According to vaccination data by community released by the state, 102% of the population is partially vaccinated, and 93% of the population is fully vaccinated as of May 10. As of the report 116% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 96% of the 5-11 year old, 119% of the 12-15 year olds, and 127% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 60-69 (4%), 0-9 and 80-89 (3%), and 10-19, 30-39, 40-49, and 50-59 (2%) ages.
