

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **YELLOW** (moderate risk) level, based on new cases in the 14 day period ending May 8. According to their weekly reports, our numbers lowered from 13.0 Average Daily Incident Rate per 100,000 on May 6 down to 12.5 Average Daily Incident Rate per 100,000 on May 13. Our percent positivity raised from 1.9% the previous week up to 2.01% this week.

Average Daily Incident Rate per 100,000 (last* 14 days)

Metrics (as of November 6) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

**last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report*

Looking at our 14 active cases, they are spread over 10 addresses. There are 3 clusters at single family homes, and 7 individual cases at single family homes.

According to vaccination data by community released by the state, 71.4% of the population is partially vaccinated, and 53.4% of the population is fully vaccinated as of May 11. As of the report 100% of the 65-74 age group, and 102% of the 75+ age group had received at least 1 shot.

According to an analysis of MAVEN data, the largest increases in cases in the past week were in the 50-59 and 60-69 (1%) age ranges. There were no new cases in the 0-9, 10-19, 20-29, 30-39, 40-49, 70-79, 80-89, and 90+ age ranges this past week.
