

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **RED** level, based on new cases in the 14 day period ending July 30. According to their weekly reports, our numbers lowered from 11.9 Average Daily Incident Rate per 100,000 on July 28 to 11.4 Average Daily Incident Rate per 100,000 on August 4. Our percent positivity raised from 6.02% last week to 6.13% this week.

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

We currently have twelve active cases; with two clusters in single family homes, and eight individual cases in single family homes.

According to vaccination data by community released by the state, 95% of the population is partially vaccinated, and 85% of the population is fully vaccinated as of August 1. As of the report 108% of the 65-74 age group, and 104% of the 75+ age group had received at least 1 shot. As of this report, data also showed 21% of the 0-4 year olds, 82% of the 5-11 year olds, 102% of the 12-15 year olds, and 113% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 70-79 (3%) and 0-9 (2%) ages.
