

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation improved to the **GREEN** level, based on new cases in the 14 day period ending March 5. According to their weekly reports, our numbers lowered from 13.5 Average Daily Incident Rate per 100,000 on March 3 to 8.8 Average Daily Incident Rate per 100,000 on March 10. Our percent positivity lowered from 3.31% last week to 2.55% this week.

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

*last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report

We currently have two active cases; both individual cases in single family homes.

According to vaccination data by community released by the state, 102% of the population is partially vaccinated, and 92% of the population is fully vaccinated as of March 8. As of the report 114% of the 65-74 age group, and 116% of the 75+ age group had received at least 1 shot. As of this report, data also showed 95% of the 5-11 year old, 119% of the 12-15 year olds, and 126% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 0-9 and 60-69 (1%) ages.
