

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **RED** level, based on new cases in the 14 day period ending July 9. According to their weekly reports, our numbers lowered from 21.9 Average Daily Incident Rate per 100,000 on July 7 to 21 Average Daily Incident Rate per 100,000 on July 14. Our percent positivity raised from 7.70% last week to 10.06% this week.

Average Daily Incident Rate per 100,000 (last* 14 days)

Metrics (as of November 6, 2020) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

**last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report*

We currently have twenty two active cases; including three clusters in single family homes.

According to vaccination data by community released by the state, 95% of the population is partially vaccinated, and 85% of the population is fully vaccinated as of July 11. As of the report 108% of the 65-74 age group, and 103% of the 75+ age group had received at least 1 shot. As of this report, data also showed 15% of the 0-4 year olds, 82% of the 5-11 year olds, 102% of the 12-15 year olds, and 113% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 80-89 (3%), and 30-39, 40-49, 50-59 and 70-79 (1%) ages.
