

Weekly COVID-19 Report

When the DPH published the updated town by town information this evening, our community risk designation remained at the **YELLOW** level, based on new cases in the 14 day period ending November 6. According to their weekly reports, our numbers raised from 10.4 Average Daily Incident Rate per 100,000 on November 4 to 15.1 Average Daily Incident Rate per 100,000 on November 12. Our percent positivity raised from 1.46% last week to 2.21% this week.

Average Daily Incident Rate per 100,000 (last* 14 days)

12/10/2020	12/17/2020	12/24/2020	12/31/2020	1/7/2021	1/14/2021	1/21/2021	1/28/2021	2/4/2021

Metrics (as of November 6) for communities with 10,000-50,000 population

Gray: less than or equal to 10 total cases

Green: less than 10 cases per 100,000 population AND greater than 10 total cases

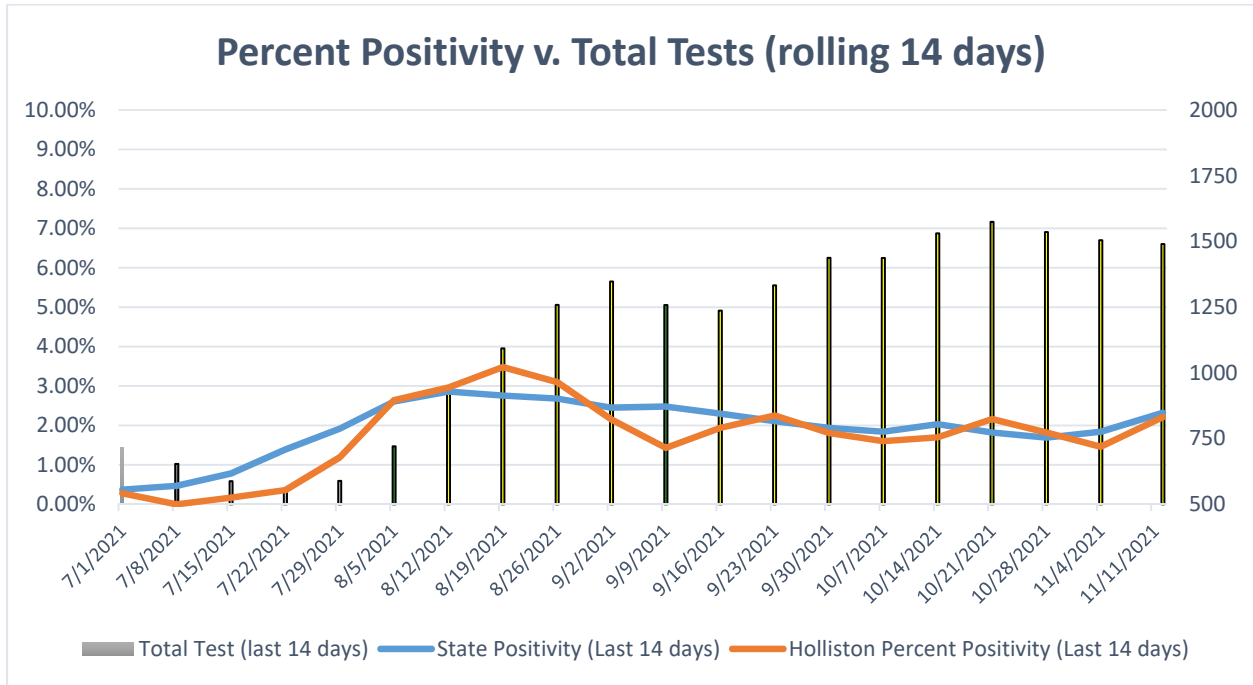

Yellow: greater than or equal to 10 cases per 100,000 population OR greater than or equal to 5% positivity rate

Red: greater than or equal to 10 cases per 100,000 population AND greater than or equal to 5% positivity rate

**last 14 days refers to the two-week reporting period ending the Saturday prior to the DPH's weekly report*

We currently have fifteen individual cases in single family homes, and five clusters at single family homes.

According to vaccination data by community released by the state, 90% of the population is partially vaccinated, and 81% of the population is fully vaccinated as of November 9. As of the report 115% of the 65-74 age group, and 115% of the 75+ age group had received at least 1 shot. As of this report, data also showed 4% of the 5-11 year old, 112% of the 12-15 year olds, and 121% of the 16-19 year olds having already received at least one shot.

In the last week, the number of cases increased the most in the 0-9 (8%), 10-19, 20-29, and 40-49 (3%), and 50-59 (2%) ages.
