

WASHINGTON STREET CORRIDOR IMPROVEMENTS

PROJECT UPDATE

September 2017

- A Pre-Construction meeting was held on Tuesday September 19 between the Town of Holliston, the engineering design consultant (McMahon Associates), and the contractor (Lorusso Corporation).
- The contractor has begun to prepare submittals for particular construction items to ensure conformance with the project specifications, prior to order. These will be transmitted for review.
- At this time the contractor's preliminary construction schedule calls for work to begin the week of Columbus Day (October 9) following the "Holliston in Bloom" event the previous weekend. Initially, work will consist primarily of installation of conduit for the new traffic signals within the brick banding area of the existing sidewalks.
