

STATUS REPORT June 2021
Water Treatment Plant– Central Street

Dear Residents:

The construction phase of the new water treatment plant started in May 2021 below are some recent updates.

The land has been cleared of trees and graded, the development of the lagoons is underway. The building department has issued the foundation permit. The contractor is in process of excavation to construct the lower level slab and foundation walls. This phase is anticipated to take several weeks as it includes steel supports, numerous conduits and sleeves for the future construction.

The project is on schedule, the first month of construction has gone as expected and there have been no issues to note.

A July 2021 status update will be posted towards the end of that month.
